WORK EXPERIENCE

Tiket.com [Indonesia]

December - July [2018 - 2019]

Front-End Engineer Intern

- Work alongside other full-time front end engineers to build the front-end implementation of the membership platform using React and Redux under the guideline of the principal front-end engineer.
- Complete the new UI for Tiket.com's login, logout, signup, forgot-password, OTP (One Time Password), Security Settings and Change Password page.
- Integrate the front-end to the backend using GraphQL.
- Uses Jest and Enzyme as the JavaScript testing utility.
- Uses SonarQube to review and analyzes code by detecting bugs, code smells and security vulnerabilities
- Technical skills learned and applied: **React, Redux, GraphQL, Unit Test[Enzyme, Jest], Clean Code, JIRA, SonarQube**

Hypernet, [Indonesia]

July – September [2017]

Software Engineering Intern

- Learned about Mikrotik RouterOS features and used it to assist team in creating a network topology with specified requirements, including: **Basic Routing, IP DHCP distribution, Access List (bandwidth management), and Hotspots.**
- Practiced designing CRUD services in a PHP Application hosted on a locally set-up XAMPP server
- Used Debian operating system hosted in a Virtual Machine to familiarize myself with unix commands.
- Technical skills learned and applied: **HTML5, CSS, Bootstrap, JavaScript, PHP, Laravel, Routing, XAMPP**

EDUCATION

BINUS International University [Indonesia]

September [2016] - Present

- Current GPA: 3.59 /4.00
- Currently pursuing a Bachelor degree in Computer Science
- Become a BINUS STAR (Student Transnational Ambassador) student by joining the student exchange program and earned a GKS Scholarship in South Korea.

NOTABLE PROJECTS

Wifiku [Indonesia]

August [2018]

Software Engineering Intern

- Lead the redesign of Wifiku website [<http://www.wifiku.net/>] and integrating with CMS to enable easy editing for other users; reducing time to update website from 2 hours to 5 minutes
- Constantly communicated with design team to provide best UI and UX for Wifiku users
- Technical skills learned and applied: **Content Management System, Wordpress**

Online Music Store

April [2017]

- Prototyped music store application that allowed insertion and purchase of songs from music library
- Technical skills learned and applied: **Java, XAMPP**
